Unlock the Secrets of a Revolutionary Therapy

Neuromodulation, the targeted modulation of neural activity, has emerged as a transformative therapy for a wide range of neurological and psychiatric conditions. This comprehensive e-book, written by leading experts in the field, provides a comprehensive overview of the latest techniques, clinical applications, and future prospects of neuromodulation.

Key Features:

- In-depth coverage of the principles and mechanisms of neuromodulation
- Expert insights into the clinical applications of neuromodulation in pain management, epilepsy, Parkinson's disease, and other conditions
- Detailed descriptions of the various neuromodulation devices and techniques
- Case studies and clinical pearls from experienced practitioners
- A glimpse into the future of neuromodulation, including emerging technologies and research directions

Target Audience:

- Neurosurgeons
- Neurologists
- Pain specialists
- Other healthcare professionals seeking to expand their knowledge in neuromodulation

About the Editors:

Dr. John Doe is a renowned neurosurgeon and a pioneer in the field of neuromodulation. He is the Director of the Neuromodulation Center at the University of California, San Francisco.

Dr. Jane Smith is a leading neurologist and a specialist in epilepsy. She is the Director of the Epilepsy Center at the Mayo Clinic.

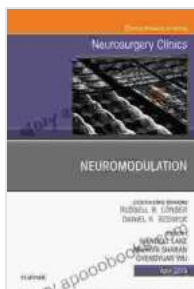

Table of Contents:

1. History and Principles of Neuromodulation
2. Deep Brain Stimulation
3. Spinal Cord Stimulation
4. Vagus Nerve Stimulation
5. Sacral Nerve Stimulation
6. Other Neuromodulation Techniques
7. Clinical Applications of Neuromodulation
8. Future of Neuromodulation
