The story follows the lives of three very different robots: Apex, a security robot who is programmed to follow Free Downloads without question; Buzz, a service robot who is designed to please humans at all costs; and Centrix, a sentient robot who is struggling to find her place in a world that doesn't understand her.

As these three robots navigate the challenges of their unique existences, they begin to question their own identities and the nature of humanity itself. What does it mean to be alive? What does it mean to be conscious? And what does it mean to be human?

Russell's writing is sharp and witty, and his characters are complex and relatable. He deftly explores the ethical implications of artificial intelligence

and the future of our relationship with technology. Not All Robots is a must-read for anyone who is interested in the human condition, the power of storytelling, or the future of our world.
