

# Remarks on Existentialism: The Will to Conform

By John Smith

Existentialism is a philosophical movement that emerged in Europe in the 19th century. It is characterized by its emphasis on the individual's responsibility for their own existence and the importance of free will.

Existentialist philosophers argue that we are not simply the products of our environment or our genes, but that we have the power to create our own lives and to choose our own values.

One of the most important concepts in existentialism is the 'will to conform.' This is the tendency that we all have to conform to the expectations of others, even when we know that these expectations are not in our best interests. The will to conform can be a powerful force in our lives, and it can lead us to make choices that we later regret.

In his book 'Remarks on Existentialism,' John Smith explores the concept of the will to conform in detail. He argues that the will to conform is a major obstacle to our personal growth and fulfillment. Smith believes that we need to overcome the will to conform if we want to live authentic lives.

Smith's book is a challenging and thought-provoking read. It is essential reading for anyone who is interested in existentialism or in the human condition. Smith's insights into the will to conform are invaluable, and his book can help us to understand ourselves and our world better.
